EDUCATION

- Beijing University of Posts and Telecommunications**

Beijing, China

B.Eng. in Integrated Circuit Design and Integrated System

2025 – 2029 (*expected*)

- School of Integrated Circuits; expected graduation: June 2029.
- GPA: 3.35/4.00; Weighted Average: 85.13/100.

RESEARCH INTERESTS

Machine Learning, Computer Vision, Robotics, Intelligent Systems

SELECTED PROJECTS

- ZhiJiao HuiYan – Vision-Guided Robotic Grasping for Water Bamboo**

BUPT

Project Member

2025 – 2026

- National Undergraduate Innovation and Entrepreneurship Training Program.
- Contributed to a vision-guided robotic system for localization, quality classification, and automated grasping of water bamboo moving on a conveyor belt.
- Supported data organization, literature review, and AI model experiments; helped prepare technical documentation and project presentation materials.
- Worked within a system integrating PyTorch/ResNet18 classification, OpenCV-based localization, control coordination, and robot motion planning.
- The team completed the national undergraduate innovation training program in 2026.

ADDITIONAL TECHNICAL EXPERIENCE

- Embedded Systems & PCB Design Practice**

BUPT

Independent and Coursework Practice

2026

- Designed basic PCB schematics and layouts using JLCEDA (EasyEDA).
- Explored STM32 development through introductory practice with GPIO, PWM, UART, and timers.

TECHNICAL SKILLS

- **Programming:** Python, C
- **AI / Computer Vision:** PyTorch, OpenCV; familiarity with CNNs and ResNet classification
- **Robotics / Embedded:** Introductory experience with STM32, URDF, and MoveIt
- **Hardware / Tools:** JLCEDA (EasyEDA), Git, Linux, MATLAB, LaTeX
- **Languages:** Mandarin Chinese (native); Fluent English (CET-4: 609/710)

HONORS & AWARDS

- First Prize, BUPT “Hongyan Cup” Student Innovation Competition**

2026

Team award for the ZhiJiao HuiYan project
